

Mendocino College

Career & Technical Education (CTE) Employment Outcomes Survey 2018

Completer and skills-building students at Mendocino College were surveyed if they met one of the following criteria in 2015-2016, and did not enroll (or were minimally enrolled) in 2016-2017: earned a certificate of 6 or more units, earned a vocational degree, or earned 9+ CTE units. The survey was administered in early 2018 by e-mail, text message (SMS), and telephone. The survey addressed student perceptions of their CTE program, employment outcomes, and how their coursework and training relate to their current career. A total of 507 students were surveyed and 184 (36%) students responded: 37% by email, 55% by phone, and 8% by SMS.

How satisfied are students with the education and training they received?

How many students secured a job that is closely related to their program of study?

How many hours per week are employed students working?

How many months did it take for students to find a job?

What were the hourly wages of the students before training versus after training?

What were the hourly wages of transfer students and non-transfer students—before training versus after training?

Does the similarity between job and program of study influence wage gains?

What is your current employment status?

More Key Results

\$8.00 is the overall change in hourly wages after completing training—in dollars

57% is the overall change in hourly wages after completing training—in percentage gain

84% of respondents reported being employed for pay

27% of respondents reported transferring to another college or university

93% of respondents reported being very satisfied or satisfied with their training.

Conclusion

The results of the survey showed that completing CTE studies and training – whether or not a credential is earned, whether or not a student transfers – is related to positive employment outcomes. The preponderance of respondents are employed and are working in the same field as their studies or training. Notably, students realize a greater wage gain after completing their studies if they secure a job that is similar to their program of study.
