### AGR-61 Mushroom Identification - Fall (1 Credits)

[Add Course to Plan](#)

This course will cover the identification and ecology of the fall mushroom flora. Emphasis is placed on keying species to genus and on identification of the more common edible and toxic species fruiting in the fall on the north coast. Lecture material will also cover ecological relationships, toxins and mushroom reproduction.

**Requisites:**  
None

[View Available Sections for AGR-61](#)

**Step 3:** Use the Search for Courses bar to search for the desired course by subject, course number, or section number and use the Filter Results to further refine your search.
